

USER PROGRESS

INTRODUCTION

Desire2Learn has a tool called User Progress that allows you to monitor student engagement and participation in your course. You can conveniently access this data in many places.

A CLOSER LOOK

What it offers:

There are two views: *Class Progress* and *User Progress*.

- *Class Progress* displays **all** of the students enrolled in your class, and their activity on 4 of the 9 available progress indicators. Here, you can get a quick gauge of student activity and compare class progress between all of your students at a glance.

All graphs and stats are hyperlinked. To see more detail, simply click on a graphical indicator.

Note: By default, content, objectives, logins, and grades display. You can change which progress indicators display according to your preference.

Class Progress					Settings	Help	Search users	
					Note: Discussions and Dropbox indicators were added			
Name	Discussions	Dropbox Folders	Logins	Grades				
	431 read	7 threads	7 replies	79 %		Logins: 14		64.38 %
	1042 read	10 threads	33 replies	88 %		Logins: 31		91.34 %
	83 read	11 threads	21 replies	88 %		Logins: 120		89.45 %
	602 read	10 threads	27 replies	78 %		Logins: 33		80.3 %
	1059 read	11 threads	31 replies	94 %		Logins: 44		89.45 %

- *User Progress* displays a summary of **one student's activity**, and allows for detailed analytics on grades, content, discussions, dropbox, quizzes, checklist, surveys, and login history.

Where you can access it:

To see *Class Progress*, go to Edit Course > **View User Progress**.

User Progress is available in a number of locations:

- Gradebook (click graph icon in front of student's name)
- Classlist (drop-down arrow next to the student's name)
- Discussions (click student photo and then graph icon)

So what can you do with this feature?

Scenario 1:

It's Week 2 of the semester, and Sam Slowstarter hasn't turned anything in yet. You'd like to know whether Sam has logged in yet at all. Access Sam's user progress from one of the locations listed above to find out.

Class Progress > User Progress

Print Settings Help

Sam Slowstarter

Course Name

> 1 Sessions

Dec 20, 2014

Absent period: 107

Absent period: 5

Sam has been in the system but never in the course

Note: Data exists for logins to the system in addition to logins to the course; look closely to make sure that you find what you are looking for.

Scenario 2:

Students did not do well in the first assessment in your course, and you wonder, "Are students watching the video and doing the reading related to the assessment?" To find out which students accessed the content page (and presumably watched the video there), go to that page in the course, and scroll down to Completion Summary.

Completion Summary

All Users | All Completed **Incomplete**

Last Name, First Name

Completion

Student, Patrick

No activity

Scenario 3:

The semester is well underway and you'd like to see if participation in discussion forums and login activity closely correlates with grades for students in your course.
