

CREATING RUBRICS

INTRODUCTION

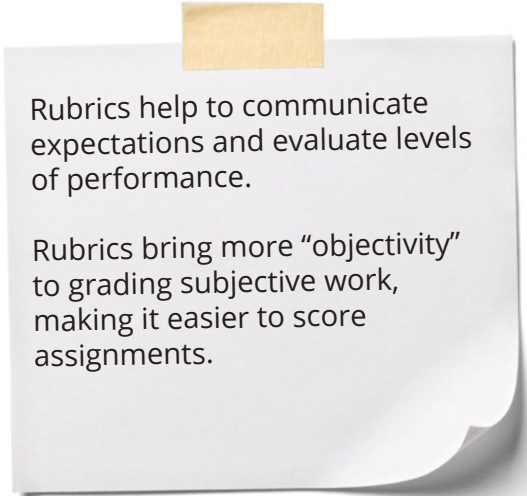

A rubric is a scoring tool used to evaluate student performance on subjective assignments such as essays, term papers, reports, presentations, discussions, and group activities. The most common format for a rubric is a table or grid in which the criteria to be assessed are listed in rows or columns. Points are assigned to each of the criteria. Each criterion point is explained in detail in the grid.

Faculty can show such rubrics in Canvas assignment pages or using rubrics in the SpeedGrader tool to grade students effectively.

A CLOSER LOOK

Here are the steps for creating a rubric.

- **Step 1:** Determine 3 to 5 elements or criteria that will be incorporated in the rubric to define a quality performance.
- **Step 2:** Determine the number of levels for each criterion.
- **Step 3:** Define highest level of performance for each criterion and fill the grid.
- **Step 4:** Fill in the rest of the levels of criteria performance from high to low.
- **Step 5:** Share this rubric with your instructional designer to implement into D2L and learn how to use Rubric tool to grade in the dropbox and discussion areas.

Rubrics help to communicate expectations and evaluate levels of performance.

Rubrics bring more “objectivity” to grading subjective work, making it easier to score assignments.

ADDITIONAL RESOURCES

You can work from examples. This Rubric Gallery contains more than two hundred thousand rubrics. They can be filtered by subjects, grade levels, and types.
